### Commentary

- Sterling slipped back in August following several months of strength as Brexit fears resurfaced
- Safe haven bond yields fell and gold rose, as tension on the Korean peninsula spooked markets
- Equity markets were mixed but on the whole firm as growth expectations continued to improve
- We reduced the fund's equity target by 1%pt and are now underweight in relation to strategic asset allocation; proceeds moved into fixed income and specialist assets
- Several holdings were reduced, in order to facilitate the 1% reduction in TAA to UK equities
- Steady interim results from Legal & General, which continues to offer an attractive dividend yield of close to 6%
- Liontrust European Enhanced Income Fund was added to in order to bring the position back to its target weight
- Royal London Short Duration High Yield Bond Fund was added to following an increase in the tactical asset allocation to fixed income
- We increased the holding of UK Mortgage Limited now that it is close to fully invested and returns should now improve
- The high inflation linkage to returns from infrastructure projects within International Public Partnerships lead us to increase the weighting as a destination for capital raised from equities
