### Investment aim

To generate long term capital growth by investing in a multi-asset portfolio, managed with a focus on value. The fund may include directly invested UK equities with a bias towards mid cap stocks, and overseas equity, fixed income and specialist assets held through third party funds.

### 5 year performance chart (%)

### Commentary

- Equity weight lowered further to 56% as further evidence of continued progression of the business cycle emerged in the form of stronger purchasing manager indices
- The reduction came in the UK and North America, with proceeds spread between short duration high yield and specialist assets where yields still look decent
- European markets were boosted by the European Central Bank's announcement that its asset purchase program would be extended for nine months
- Intermediate Capital was exited on valuation grounds following strong performance and in order to instigate the asset allocation reduction to UK equities. The dividend yield had close to halved since 2014, to stand at just 3%
- Corporate activity within the specialist lending sector highlighted the value that exists in the sector. First Rand approached Aldermore, providing some readacross to OneSavings Bank
- Following a reduction to the tactical asset allocation weight to North America, the Yacktman US Equity Fund was reduced
- The holding in the Royal London Short Duration High Yield Bond Fund was increased following a lift in the tactical asset allocation to corporate bonds
- We supported the further equity raising by Greencoat UK Wind having previously taken profits at higher price levels. The management team have built a solid portfolio of wind assets
- After a solid first 10 months building a conservatively balanced portfolio of asset backed loans, we participated in the further equity issuance by RM Secured Direct Lending
