COMMENTARY

- The potential for a second wave of COVID-19 reminds us that the struggle is far from over and until there is a workable vaccine, economies will likely remain constrained by containment measures aimed at slowing the spread of infection.
- With Japan's economic recovery lagging other equity markets and sterling's recent strength versus the yen in recent months, we took the opportunity to add to the Morant Wright Fuji Yield Fund.
- Reductions were made across a number of specialist assets holdings after the rally and enabled the recycling of capital elsewhere. Sequoia Economic Infrastructure, Merian Chrysalis, AEW UK REIT and Hipgnosis Songs fund had all rallied from their March lows.
- Merian Chrysalis announced a 26% uplift in the quarterly NAV as at end June, driven by the rebound in equity markets, the partial realisation of its largest holding and strong results from The Hut Group and Klarna Bank.

Your capital is at risk. Past performance should not be seen as an indication of future performance. The value of investments and any income may fluctuate and investors may not get back the full amount invested.

IMPORTANT INFORMATION

*Defensive assets have reduced/negative correlation to equity markets to provide a more defensive element during times of stress. Defensive assets consists of a variety of investments such as gold**, government bonds, short ETFs and managed futures strategies. **Exposure to physical gold is achieved through investments in exchange traded certificates (ETC) which aim to provide the performance of gold, as measured by the LBMA Gold Price (PM), which is a recognised benchmark for gold. A Gold ETC is a certificate which is secured by gold bullion, held within the vaults of a nominated custodian.

1. The Historic Yield reflects distributions declared over the past twelve months as a percentage of the unit price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. A portion of the fund's expenses are charged to Capital. This has the effect of increasing the distribution(s) for the year and constraining the fund's capital performance to an equivalent extent.
