

**SENECA GLOBAL INCOME & GROWTH TRUST PLC**  
 MONTH END AUGUST 2020  
 FOR RETAIL INVESTORS ONLY

**INVESTMENT OBJECTIVE**

Over a typical investment cycle<sup>1</sup>, the Company will seek to achieve a total return of at least CPI plus 6 percent per annum after costs with low volatility, and with the aim of growing aggregate annual dividends at least in line with inflation, through the application of a Multi-Asset Value Investment Policy.

The manager takes active allocation decisions within defined ranges. These tactical moves are made through a combination of direct investment and commitments to third party funds, both open and closed ended.

**COMMENTARY**

- The potential for a second wave of COVID-19 reminds us that the struggle is far from over and until there is a workable vaccine, economies will likely remain constrained by containment measures aimed at slowing the spread of infection.
- After a severe widening of credit spreads as a result of the COVID-19 crisis we reduced our allocation to our short duration fund and allocated the capital to the Royal London Sterling Extra Yield Bond Fund
- Reductions were made across a number of specialist assets holdings after the rally and enabled the recycling of capital elsewhere. Sequoia Economic Infrastructure, Merian Chrysalis, AEW UK REIT and Hipgnosis Songs fund had all rallied from their March lows.
- Merian Chrysalis announced a 26% uplift in the quarterly NAV as at end June, driven by the rebound in equity markets, the partial realisation of its largest holding and strong results from The Hut Group and Klarna Bank.

Your capital is at risk. Past performance should not be seen as an indication of future performance. The value of investments and any income may fluctuate and investors may not get back the full amount invested.

Cumulative & Discrete Figures are sourced from Seneca IM, Bloomberg Finance LP, Trading Economics & Morningstar. Share prices calculated on a total return basis with net dividends reinvested. NAV returns based on NAVs including income and with debt valued at par. Returns do not include current year revenue. Benchmark: CPI plus 6% from 06.07.17. Previously LIBOR GBP 3 Months plus 3%, all after costs. For the periods ending 31.08.2020, a forecast CPI is used. The information on this factsheet is as at 31.08.2020 unless otherwise stated.  
<sup>1</sup> Seneca IM defines a typical investment cycle as one which spans 5-10 years, and in which returns from various asset classes are generally in line with their very long term averages.

### IMPORTANT INFORMATION

\*Defensive Assets typically have reduced/negative correlation to equity markets to provide a more defensive element during times of stress. Defensive assets consists of a variety of investments such as gold\*\*, government bonds, short ETFs and managed futures strategies. \* Exposure to physical gold is achieved through investments in exchange traded certificates (ETC) which aim to provide the performance of gold, as measured by the LBMA Gold Price (PM), which is a recognised benchmark for gold. A Gold ETC is a certificate which is secured by gold bullion, held within the vaults of a nominated custodian.
